MOSHOOD
ABDULLAHI

Software Developer

PROJECT EXPERIENCE

Quizzal - Performance Accessment App

https://quizzal.onrender.com

A fullstack service where I implemented UI with REACT + TS and styled with STYLE COMPONENTS. I used USECONTEXT hook as store for react app.

I set up backend server with NODE + EXPRESSJS and used RESTAPI for endpoints. I used MONGODB as database and MONGOOSE as ODM.

I dockerised the app and initially deployed it on AWS ECS. I used Git & GitHub for version control.

Lorem Gym - Gym Membership App

https://lorem-gym.onrender.com

I set up backend server with NODE + EXPRESS + TYPESCRIPT and used MYSQL as database and SEQUELIZE as ORM.

I created views with EJS template engine, styled with SCSS, and rendered directly from the server.

ProjMgt | Project Management App

https://proj-mgt.onrender.com

I used GraphQL to set up endpoint on EXPRESS server.

I used REDUX store on REACT app and APOLLO GRAPHQL to communicate with backend

E-Commerce API | REST API

https://e-commerce-api-ttap.onrender.com

I used TYPESCRIPT to manage backend built on NODE + EXPRESS.

I used STRIPE and WEBHOOK to handle payments and SENDGRID for sending emails. I generated docs with docgen.

PROFILE

I am a full stack developer who's well-versed in databases, server configuration and user interface alongside implementing a seamless user experience through my diverse familiarity with modern technologies.

SKILLS

I can efficiently mplement interesting user interface with **JAVASCRIPT + TYPESCRIPT** and its framework i.e **REACTJS , VUEJS.**

I'm well versed in server configuration with ability to work with **NODEJS, EXPRESSJS** and inept knowledge of core concepts like **REST & GRAPHQL .**

Flexibility in database with knowledge of **MySQL, POSTGRESQL** and **MONGODB**

Knowledge of webpage design with CSS and its libraries like **TailwindCSS** and **SASS**

Considerable understanding of DevOps with ability in **VM, Linux, AWS** and other technologies like **Docker, Git & GitHub.**
