# Moshood Abdullahi

I am a full stack developer who's well-versed in databases, server configuration and user interface alongside implementing a seamless user experience through my diverse familiarity with modern technologies.

## PROJECT EXPERIENCE

### Quizzal - A Quiz App

React - ExpressJS - MongoDB - TS - Sendgrid - Docker - AWS ECS

This app allows tutors create quiz and set questions for quiz created or get pre-existing questions from the DB after which he publishes the quiz and add private participants( if the quiz is not open to the public ). The participants can access the quiz from anywhere with the unique quiz code and their details, take their test, and submit answers. The tutor can access test results and release these results and the participant will be noitified to check their results after it's published.

### Jobtify | Jobs Management App

React - NodeJS - ExpressJS - MongoDB

The app allows users keep track of their job application. Users can stay updated with their job application status.

### Lorem Gym | Gym Membership App

EJS - SCSS - ExpressJS - MySQL

Lorem Gym app allows the gym keep track of membership subscription status and also register new members. Members also check into the gym and renew their subscription.
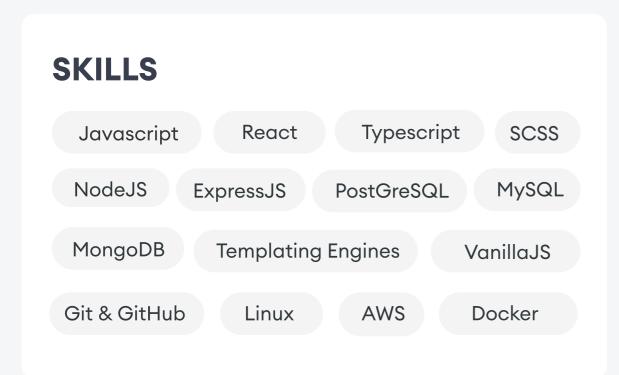

### E-Commerce API | REST API

NodeJS - Express - Typescript - MongoDB

This rest API defines multiple endpoints that can be efficiently integrated into an E-Commerce app.

### ProjMgt | Project Management App

EJS - SCSS - ExpressJS - MySQL

The app allows users keep track of their ongoing projects and manage projects activities. It also aids keeping client records.

## SKILLS

- Javascript
- React
- Typescript
- SCSS
- NodeJS
- ExpressJS
- PostGreSQL
- MySQL
- MongoDB
- Templating Engines
- VanillaJS
- Git & GitHub
- Linux
- AWS
- Docker
